

# TURKS & CAICOS Islands

BEAUTIFUL BY NATURE

AN ECOLOGICAL HAVEN

---

## EXTENSIVE WETLANDS ARE HOME TO THOUSANDS OF BIRDS

Only a short ride away find ospreys, pelicans and numerous other bird species of North Caicos. Paddle a kayak down the pristine mangrove-lined waters and at the end of the kayak ride, float on the fast current down to the many sand bars which dot the untouched mouth of Bottle Creek.

## EXPLORE THE UNIQUE ENVIRONMENT OF TURKS AND CAICOS

Turks and Caicos is not just a small group of Caribbean islands, but an archipelago of astonishing and well-preserved ecosystems. Hop over to Little Water Cay to see the indigenous rock iguana feast and frolic in the natural flora and fauna, or photograph an egret as it stalks its prey.

*An eco-archipelago of astonishing bio-diversity*

## THE RURAL CARIBBEAN AS IT ONCE WAS

Follow the kayak with a bike ride through North Caicos' countryside, which will show you the rural villages: the Caribbean as it once was. Stop by My Dee's for a fresh lunch of cracked conch or grouper.

Then it's onto a superb hilltop view of the pink flamingoes' watery habitat. In Middle Caicos explore the limestone caves and Mudjin Harbour, possibly the most stunning beach in the Turks and Caicos Islands. Visit West Caicos' Lake Catherine, also home to pink flamingoes and other wading birds.

It's only a 15 minute flight to Grand Turk's Columbus Passage, where between January and April the entire pod of more than 1500 Atlantic hump-back whales migrates to the warm waters between Grand Turk and Salt Cay to calf and mate. Dive in and listen to the world's greatest natural symphony; a whale concert heard for nautical miles around.

*Combine kayaking, horse-back riding, biking, trekking and diving*

## LEAVE NOTHING, TAKE AWAY ONLY YOUR MEMORIES

Eco-tours in TCI are as soft or rough an adventure as you wish. Beginners of all ages for all activities are welcomed and trips are tailored to all levels. Combine snorkeling, biking, horseback riding, hiking and diving from resort course to expert course level, as you wish.

Trips can vary from a 1/2 day taste of soft adventure and watersports to multi-day, multi-island all-inclusive and custom-designed itineraries.

We practice sustainable tourism with minimal impact. We want to create nothing but memories and our guests' enhanced understanding of our natural history, culture and geography.
